

pharma& to Highlight Post-Progression Data for Rubraca® (rucaparib) in HRD-Negative and HRD-Unknown Advanced Ovarian Cancer at ESGO Congress 2026

Intended for the healthcare media

Vienna, Austria, February 17, 2026 – pharmaand GmbH (pharma&), a global company dedicated to preserving the availability and fostering the further development of essential medicines to leave no patient behind, today announced post-progression data for Rubraca® (rucaparib) in advanced ovarian cancer will be presented in a poster session during the **European Society of Gynaecological Oncology (ESGO)'s 27th European Gynaecological Oncology Congress** taking place Feb. 26 – 28 in Copenhagen, Denmark.

Abstract No. 635: Rucaparib maintenance in ATHENA-MONO (GOG3020/ENGOT-ov45) in patients with newly diagnosed advanced ovarian cancer: exploratory post-progression evaluations for patients with homologous recombination deficiency (HRD)-negative and HRD-unknown tumors

Presenter: Dr. Vanda Salutari, Department of Health of Women and Child, Catholic University of Sacred Heart, Rome, Italy

Lead Author: Dr. Flora Zagouri, Aretaieio Hospital, National and Kapodistrian University of Athens School of Medicine, Athens, Greece

Time and Date: 5:20 p.m. CEST, Friday, February 27

Poster Number: P06-23

Location: Bella Center Exhibition Hall

pharma& has also organized and funded a medical symposium, "PARP Inhibitors in Advanced Ovarian Cancer, Expanding Horizons: Transforming Outcomes and Supporting Patients to Move Forward."

Presenters:

- Prof. Domenica Lorusso, Humanitas Hospital San Pio X, Humanitas University, Milan, Italy
- Dr. Rebecca Kristeleit, Guy's and St Thomas' NHS Foundation Trust, London, UK
- Dr. Vanda Salutari, Department of Health of Women and Child, Catholic University of Sacred Heart, Rome, Italy
- Prof. Jalid Sehoul, Department of Gynecology, Charité Universitätsmedizin, Berlin, Germany
- Robin Lyn Gooch, Patient and Representative, German Ovarian Cancer Foundation

Time and Date: 11:00 a.m. CEST, Friday, February 27

Location: Bella Center Session Hall 3

Attendees can **visit pharma& at booth 01**, in **Hall D3** of the Bella Center Copenhagen.

About the ATHENA Clinical Trial

ATHENA (GOG 3020/ENGOT-ov45) ([NCT03522246](https://clinicaltrials.gov/ct2/show/study/NCT03522246)) is an international, randomized, double-blind, phase III trial consisting of two separate and fully independently powered study comparisons evaluating rucaparib monotherapy (ATHENA-MONO) and rucaparib in combination with nivolumab (ATHENA-COMBO) as maintenance treatment for patients with newly diagnosed advanced epithelial ovarian, fallopian tube, or primary peritoneal cancer. ATHENA enrolled approximately 1000 patients across 24 countries, all women with newly diagnosed ovarian cancer who responded to their first-line chemotherapy. The trial completed accrual in 2020 and was conducted in association with the GOG Foundation, Inc. (GOG-F) in the U.S. and the European Network of Gynaecological Oncological Trial groups (ENGOT) in Europe. GOG-F and ENGOT are the two largest cooperative groups in the U.S. and Europe dedicated to the treatment of gynecological cancers.

ATHENA-MONO is evaluating the benefit of rucaparib monotherapy versus placebo in 538 women in this patient population. The primary efficacy analysis evaluated two prospectively defined molecular sub-groups in a step-down manner: 1) HRD-positive (inclusive of BRCA mutant) tumors, and 2) the intent-to-treat population, or all patients treated in ATHENA-MONO.
